

VA.8.130/.. F

- high load-bearing capacity
- flexible to use

FEATURES

watertight, resistant to heavy loads, trafficable by fork-lift trucks, expansion insert can be replaced anytime, abrasion, weather and temperature resistant (-40°C bis +120°C), resistant to salt and waste-water (alcalics, microbes, bacteria), agreements may also be made for other sealing sections

APPLICATIONS

outdoor, multi-storey and underground park decks, ramp accesses, pedestrian bridges, all industrial applications

hot-dip galvanised steel substructure and high-grade steel V2A surface, synthetic rubber flexible insert (EPDM), sealing insert made from Wolfin IB

COVERING TYPES

asphalt, screed, natural and stone slabs

TRAFFICABILITY

passenger car, trucks, fork-lifts

FORMED PARTS

upstand, membrane upstand, corner piece, T piece, cross piece, transition floor to wall

NOTES

The sealing and flexible inserts are connected using M10 bolts positioned at intervals of 150 mm.

The sealing insert wich is looking on the sides of the profile out, has to be connected properly with the sealing system. This is very important to get a watertight result of the joint-profile.

Our engineers and technicians can be of assistance during installation on request.
